Preface	xiii
---------------	------

Atomic Physics

Charge Transfer Calculations for Astrophysical Modeling	1
Phillip C. Stancil	
Charge Transfer Experiment	15
Charles C. Havener	
Measurement of Electron Capture Cross-Sections at keV Energies and Charge Transfer Rate Coefficients at eV energies	31
Victor H. S. Kwong et al	
Dielectronic Recombination	35
N. R. Badnell	
Dielectronic Recombination: Experiment	51
Alfred Müller & Stefan Schippers	
Computation of New Dielectronic Recombination Data	77
T. W. Gorczyca & K. T. Korista	
Inner-shell Photoionization, Fluorescence, and Auger Yields	85
Brendan M. McLaughlin	
Photoionization and Heating of a Well-characterized Iron Plasma	115
M. E. Foord et al.	
Photoionized Plasma Calculations using Laboratory and Astrophysical Models	121
M. E. Phillips et al.	
Atomic and Ionic Photoionization Data for Astrophysics: Applications of the Dual Laser Plasma Technique	125
E. T. Kennedy et al.	
Collective Behavior in Photoionization of Outer Atomic Subshells of Noble Gas Atoms	131
A. Z. Msezane et al.	
Collision Strengths for Fine-Structure Transitions	135
K. A. Berrington	
Collision Strengths of Fine-Structure Transitions in Fe X, Fe XI, and Fe XIII	149
S. S. Tayal	
Parametric Estimates of Line Broadening due to Quadratic or Linear Stark Effect	153
Marie-Christine Artru	

NIST Databases on Atomic Spectra.....157
 D. E. Kelleher et al.

Standard Formats for Atomic Data: the APED.....159
 Randall K. Smith et al.

Atomic Data Needs for Modeling Photoionized Plasmas.....165
 Daniel Wolf Savin

Numerical simulations

Photoionization Modeling Codes.....173
 Timothy R. Kallman

From escape probabilities to exact radiative transfer.....193
 Ivan Hubeny

Large-Scale Microturbulence and BLR Emission Lines217
 Mark Bottorff & Gary Ferland

Photoionization Models of Inhomogeneous Nova Shells.....223
 Marcos Diaz

Codes for optically thick and hot photoionized media - Radiative transfer and new developments.....227
 Anne-Marie Dumont & Suzy Collin

Numerical Methods for Plasma Dynamics.....255
 James M. Stone

Three-dimensional Monte Carlo simulations of Ionized Nebulae.....275
 Barbara Ercolano

Spectral Simulations from a Model Hydrogenic Atom.....281
 Jason W. Ferguson et al.

Stellar Photoionization Models of the LINER/H II Region Transition Object NGC 4569289
 J. R. Gabel & F. C. Bruhweiler

Time Dependent Radiation-Hydrodynamic Simulations of SNR and their Photoionized Precursor Regions293
 S. Jane Arthur

Parallel Supercomputing In Stellar Atmosphere Simulations297
 Peter H. Hauschildt et al.

Time Dependence in Plasma Codes317
 S. Seager

CMFGEN: A non-LTE Line-Blanketed Radiative Transfer Code for Modeling Hot Stars with Stellar Winds333
 D. John Hillier & Thierry Lanz

NLTE Model Atmospheres for OB Stars 341
 Thierry Lanz & Ivan Hubeny

FeII Emission Lines: Numerical Models and Spectroscopic Observations of the Nebula Associated with Eta Carinae 345
 Ekaterina Verner et al.

An Empirical Ultraviolet Iron Spectrum Template Applicable to Active Galaxies 349
 M. Vestergaard & B. Wilkes

Grains in Photo-Ionized Environments 353
 P.A.M. van Hoof et al.

Modeling the Effects of Dust on Ionized Regions 369
 Kevin Volk

Modeling AGN dust distributions with the Continuum Radiative Transfer Code DUSTY 373
 M. Nenkova, M. Elitzur, & Ž. Ivezić

The Unified Theory of Absorption Outflows in BAL QSOs and Seyfert Galaxies 377
 E.Y. Vilkoviskij

Reliability in the face of complexity - the challenge of high-end scientific computing 381
 Gary Ferland

Observations

X-ray observations of AGN 389
 Jelle S. Kaastra

X-ray Spectroscopy of Accretion Disks and Stellar Winds in X-Ray Binaries 407
 Duane A. Liedahl et al.

Ionized Iron Lines in X-ray Reflection Spectra 447
 D.R. Ballantyne, R.R. Ross, & A.C. Fabian

Weighing Black Hole Masses with Warm Absorbers 451
 R. Morales & A.C. Fabian

Ultraviolet and Optical Spectroscopy 455
 K. Davidson

Infrared Spectroscopy of Atomic Lines in Gaseous Nebulae 469
 R.H. Rubin et al.

Photoionization Modeling of Infrared Fine-Structure Lines in Luminous Galaxies with Central Dust-Bounded Nebulae 489
 Jacqueline Fischer et al.

Spatially-Resolved Spectroscopy of Eta Carinae and Its Ejecta Using STIS	493
Theodore R. Gull & Kazunori Ishibashi	
Empirical Determination of Fe II Oscillator Strengths in the FUSE Bandpass	501
J. Christopher Howk	
FIFI LS: The Field-Imaging Far-Infrared Line Spectrometer for SOFIA ...	505
R. Klein et al.	
The Kinematics and Physical Conditions in the Narrow-Line Regions of the Seyfert Galaxies NGC 1068 and NGC 4151	509
Steven B. Kraemer & D. Michael Crenshaw	
FUSE Observations in M27	513
Stephan R. McCandliss	
Implications of Broad-Line Emission in LINERs	519
Joseph C. Shields & Michael Eracleous	
 Conference Benchmarks	
Photoionization model nebulae	523
Daniel Péquignot et al.
